Trencor Limited and Subsidiaries Annual Financial Statements

Audit committee report

The audit committee has fulfilled all of its functions in terms of the Companies Act of South Africa, as described in the corporate governance report.

Directors' responsibility statement

The directors are responsible for the preparation and fair presentation of the group annual financial statements and annual financial statements of Trencor Limited, comprising the statements of financial position at 31 December 2010, and the statements of comprehensive income, changes in equity and cash flows for the year then ended, and the notes to the financial statements, which include a summary of significant accounting policies and other explanatory notes, and the directors' report, in accordance with International Financial Reporting Standards, and in the manner required by the Companies Act of South Africa.

The directors are also responsible for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error, and for maintaining adequate accounting records and an effective system of risk management, as well as the preparation of the supplementary schedules included in these financial statements.

The directors have made an assessment of the ability of the company and its subsidiaries to continue as going concerns and have no reason to believe that the businesses will not be going concerns in the year ahead.

The auditor is responsible for reporting on whether the group annual financial statements and annual financial statements are fairly presented in accordance with the applicable financial reporting framework.

Approval of group annual financial statements and annual financial statements

The group annual financial statements and annual financial statements of Trencor Limited, as identified in the first paragraph, which have been approved by the board of directors, are attached:

Cape Town 29 April 2011

Independent Auditor's Report to the members of Trencor Limited

Report on the financial statements

We have audited the group annual financial statements and the annual financial statements of Trencor Limited, which comprise the statements of financial position at 31 December 2010, and the statements of comprehensive income, changes in equity and cash flows for the year then ended, and the notes to the financial statements which include a summary of significant accounting policies and other explanatory notes, and the directors' report, as set out on pages 20 to 69.

Directors' responsibility for the financial statements

The company's directors are responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards, and in the manner required by the Companies Act of South Africa, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant

to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

In our opinion, these financial statements present fairly, in all material respects, the consolidated and separate financial position of Trencor Limited at 31 December 2010 and its consolidated and separate financial performance and consolidated and separate cash flows for the year then ended in accordance with International Financial Reporting Standards, and in the manner required by the Companies Act of South Africa.

Declaration by the Company Secretary

It is hereby certified that for the year ended 31 December 2010, the company has lodged with the Registrar of Companies all returns as are required by a public company in terms of the Companies Act of South Africa and that such returns are true, correct and up to date.

Trencor Services (Pty) Ltd Secretaries Per G W Norval Cape Town 29 April 2011

Directors' Report

General review

The nature of the company's business is described on the inside front cover. The financial results are reflected in the financial statements on pages 22 to 69.

The profit attributable to equity holders of the company from the various classes of business of the group was as follows:

	2010 Rm	2009 Rm
Container operations		
Container finance	17	19
Textainer	581	486
Exchange translation losses	(63)	(215)
Net long-term receivable adjustment	136	(11)
Interest and other corporate		
items	(47)	(27)
Discontinued operations	-	7
	624	259

Directors and secretary

The names of the directors appear on page 2 and that of the secretary on page 70. Mr H Wessels was appointed as an independent non-executive director with effect from 1 April 2011.

In terms of the articles of association Messrs N I Jowell, J E McQueen and H R van der Merwe retire by rotation at the forthcoming annual general meeting and Mr H Wessels, who was appointed as a director after the preceding annual general meeting, also retires. These retiring directors are eligible and offer themselves for re-election.

Brief résumés of the directors are presented on page 72.

Directors' interests

The aggregate of the direct and indirect beneficial interests of the directors in the issued shares of the company at 31 December 2010 was 11,8% (2009: 11,8%).

The direct and indirect beneficial interests of each director who held in excess of 1% of the issued shares at 31 December 2010 and 2009 were as follows:

	2010 %	2009 %
C Jowell	5,8	5,8
N I Jowell	5,9	5,9

The specific share repurchase of 10 800 881 Trencor shares from trusts in respect of which Messrs C Jowell and N I Jowell are amongst the beneficiaries was implemented on 14 March 2011 (refer note 35 on page 69). From that date, the direct interests of each director who held in excess of 1% of the issued shares were as follows:

	%
C Jowell	3,1
N I Jowell	3,2

^{1 61,6%} of the issued shares of Textainer at 31 December 2010 is owned by Halco Holdings Inc ('Halco'). Halco is incorporated in the British Virgin Islands and is wholly-owned by the Halco Trust, a trust resident in Liechtenstein. Trencor and certain of its wholly-owned South African subsidiaries are the nominated sole beneficiaries of the Halco Trust. The protectors of the Halco Trust are Messrs C Jowell, N I Jowell, J E McQueen, D M Nurek and E Oblowitz.

A complete list of subsidiary companies is available on request. The interest of the company in their aggregate profits and losses after tax is as follows:

	2010	2009
	Rm	Rm
Profits	673	500
Losses	(14)	(228)
	659	272

Special resolutions

At the annual general meeting held on 26 May 2010, shareholders passed a special resolution, which was registered on 10 June 2010, to grant the company a general authority for the acquisition by the company or any of its subsidiaries of shares issued by the company. This authority is valid until the earlier of the next annual general meeting or the variation or revocation of such general authority by special resolution by any subsequent general meeting of the company, provided that it shall not extend beyond fifteen months from the date of passing of the resolution.

At a general meeting held on 14 December 2010, shareholders passed a special resolution, which was registered on 11 January 2011, for the specific share repurchase of 10 800 881 Trencor shares at a price of R38,61 per share from trusts in respect of which Messrs C Jowell and N I Jowell are amongst the beneficiaries. The share repurchase was implemented on 14 March 2011 and the resultant issued share capital in Trencor is R883 340,06 comprising 176 668 011 ordinary shares with a par value of 0,5 cent each.

Special resolutions of subsidiaries

During the period under review, no special resolutions were passed by the company's South African subsidiaries and no shareholder resolutions of material interest were passed by the company's non-South African subsidiaries.

Analysis of shareholders

An analysis of shareholders and of holders who held 3% or more of the issued shares at 31 December 2010 is presented on page 70. In addition, an analysis of shareholders and of holders who held 3% or more of the issued shares at 25 March 2011 (i.e. post the unbundling by Mobile of its 46,25% interest in Trencor and the specific share repurchase by Trencor of 10 800 881 Trencor shares) is presented on page 71.

² Reduced to 60,9% subsequent to the year-end following the issue of restricted share units.

^{* 2009:} R11 million cash included in assets classified as held for sale.

for the year ended 31 December 2010

1. Reporting entity

Trencor Limited (the 'company') is a company incorporated in the Republic of South Africa. The address of the company's registered office is 1313 Main Tower, Standard Bank Centre, Heerengracht, Cape Town, 8001. The consolidated financial statements of the company as at and for the year ended 31 December 2010 comprise the company and its subsidiaries (together referred to as the 'group' and individually as 'group entities') and the group's interest in associates. The group is primarily involved in owning, leasing, managing and reselling marine cargo containers worldwide, and related financing activities.

2. Basis of preparation

2.1 Statement of compliance

The financial statements have been prepared in accordance with International Financial Reporting Standards ('IFRS'), South African Statements and Interpretations of Statements of Generally Accepted Accounting Practice (AC 500 Series) and the requirements of the Companies Act of South Africa. The financial statements were approved by the board of directors on 29 April 2011.

2.2 Basis of measurement

The separate and consolidated financial statements have been prepared on the historical cost basis except for the following:

- · derivative financial instruments are measured at fair value:
- · financial instruments at fair value through profit or loss are measured at fair value;
- · available-for-sale financial assets are measured at fair value; and
- · non-current assets and disposal groups held for sale are measured at the lower of their carrying amount or fair value less costs to sell.

2.3 Functional and presentation currency

These separate and consolidated financial statements are presented in South African rand, which is the company's functional currency. All financial information presented in South African rand has been rounded to the nearest million.

2.4 Use of estimates and judgements

The preparation of financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and any future periods affected.

Information about significant areas of estimation uncertainty and critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements are described in note 33.

2.5 Changes in accounting policies

Accounting for business combinations and acquisition of non-controlling interests

The group chose to early adopt the requirements of the amendments to IAS 27 Consolidated and Separate Financial Statements as well as IFRS 3 Business Combinations (2008) effective 1 January 2009, therefore there has been no impact on the current year financial results. The policy is described in note 3.1.1.

3. Significant accounting policies

The accounting policies set out below have been applied consistently to all periods presented in these separate and consolidated financial statements, and have been applied consistently by group entities.

3.1 Basis of consolidation

3.1.1 Subsidiaries

Subsidiaries are entities controlled by the group. Control exists when the group has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, potential voting rights that currently are exercisable are taken into account. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases. The accounting policies of subsidiaries have been changed when necessary to align them with the policies adopted by the group.

Business combinations are accounted for using the acquisition method as at the acquisition date, which is the date on which control is transferred to the group. Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, the group takes into consideration potential voting rights that currently are exercised.

Changes in any group entity's ownership interest in a subsidiary after control is obtained are accounted for as equity transactions i.e. transactions with owners in their capacity as owners. Accordingly, gains or losses which arise from acquisitions or disposals of non-controlling interests are accounted for as equity transactions

for the year ended 31 December 2010

provided control is retained after the conclusion of such transactions.

In the case of the company, investments in subsidiaries are carried at cost, less accumulated impairment losses.

3.1.2 Associates

Associates are those entities in which the group has significant influence, but not control, over the financial and operating policies. Significant influence is presumed to exist when the group holds between 20 and 50 per cent of the voting power of another entity. Associates are accounted for using the equity method (equity accounted investees) and are recognised initially at cost. The group's investment includes goodwill identified on acquisition, net of any accumulated impairment losses. The consolidated financial statements include the group's share of the income, expenses and equity movements of equity accounted investees, after adjustment to align the accounting policies with those of the group, from the date that significant influence commences until the date that significant influence ceases. When the group's share of losses exceeds its interest in an associate, the carrying amount of that interest, including any long-term investments is reduced to nil and recognition of further losses is discontinued except to the extent that the group has an obligation or made payments on behalf of the investee.

Gains or losses arising on the dilution of investments in associates are recognised in profit or loss and the net gain or loss attributable to the group is transferred to a separate reserve in equity. In the case of the company, investments in associate companies are carried at cost, less accumulated impairment losses.

3.1.3 Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealised income and expenses arising from intra-group transactions, are eliminated in preparing the consolidated financial statements.

Unrealised gains arising from transactions with equity accounted investees are eliminated against the investment to the extent of the group's interest in the entity. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

3.2 Foreign currency

3.2.1 Foreign currency transactions

Transactions in foreign currencies are translated to the respective functional currencies of group entities at exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated to the functional currency at the exchange rate ruling at that date. The foreign currency gain or loss on monetary items is the difference between amortised cost in the functional currency at the beginning of the period, adjusted for effective interest and payments during the period, and the amortised cost in foreign currency translated at the exchange rate at the end of the period. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are translated to the functional currency at the exchange rate at the date that the fair value was determined. Non-monetary items in a foreign currency that are measured in terms of historical cost are translated using the exchange rate at the date of the transaction. Foreign currency differences arising on translation are recognised in profit or loss except for differences arising on the translation of available-for-sale equity instruments which are recognised in other comprehensive income.

3.2.2 Foreign operations

The assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on acquisition, are translated to SA rand at foreign exchange rates at the reporting date. The income and expenses of foreign operations are translated to SA rand at rates at the dates of the transactions. Foreign currency differences are recognised in other comprehensive income, and presented in the foreign currency translation reserve in equity. However if the operation is a nonwholly-owned subsidiary, then the relevant proportionate share of the translation difference is allocated to the non-controlling interests. When a foreign operation is disposed of, in part or in full, the relevant amount in the foreign currency translation reserve is transferred to profit or loss as part of the profit or loss on disposal. When the group disposes of only part of its interest in a subsidiary that includes a foreign operation while retaining control, the relevant proportion of the cumulative amount is attributed to non-controlling interests.

3.3 Financial instruments

3.3.1 Non-derivative financial instruments

Non-derivative financial instruments are recognised initially at fair value plus, for instruments not at fair value through profit or loss, any directly attributable costs. Subsequent to initial recognition non-derivative financial instruments are measured as described below.

Loans and receivables are recognised on the date that they are originated. All other financial instruments (including assets designated at fair value through profit or loss) are recognised initially on the trade date which is the date that the group becomes a party to the contractual provisions of the instrument. Financial assets are derecognised if the group's contractual rights to the cash flows from the financial assets expire or if the group transfers the right to receive the contractual cash flows on the financial asset in a transaction in which substantially all risks and rewards of ownership of the financial asset are transferred. Any interest in the transferred financial assets that is created or retained by the group is recognised as a separate asset or liability.

The group classifies non-derivative financial assets into the following categories: available-for-sale financial assets, financial assets at fair value through profit or loss, and loans and receivables.

Available-for-sale financial assets

The group's investments in equity securities and certain debt securities are classified as available-for-sale financial assets, unless they meet the requirements of another IAS 39 financial instrument classification. Subsequent to initial recognition, they are measured at fair value and changes therein, other than impairment losses (see accounting policy note 3.9), are recognised in other comprehensive income and presented within equity in the fair value reserve. The fair value of listed investments classified as available-for-sale is their quoted bid price at the reporting date. The fair value of unlisted investments is based on valuations received from independent valuers during the period. When an investment is derecognised, the cumulative gain or loss in other comprehensive income is reclassified to profit or loss.

Assets at fair value through profit or loss

An instrument is classified at fair value through profit or loss if it is held for trading or is designated as such upon initial recognition. Financial instruments are designated at fair value through profit or loss if the group manages such instruments and makes purchase and sale decisions based on their fair value in accordance with the group's documented management or investment strategy. Upon initial recognition, attributable transaction costs are recognised in profit or loss when incurred. Financial instruments at fair value through profit or loss are measured at fair value, and changes therein are recognised in profit or loss.

The group's long-term receivables are designated at fair value through profit or loss. Sales under long-term credit agreements are discounted to their net present value at rates considered appropriate, having regard to their terms and the currency in which they are written. The deferred portion of income is recognised over the period of the agreements on a basis which produces a constant periodic rate of return. At the financial year-end, receivables denominated in foreign currencies are translated at rates of exchange ruling at the reporting date. Any gains or losses arising from this translation are recognised in profit or loss.

Loans and receivables

Loans and receivables are financial assets with fixed or determinable payments that are not quoted in an active market. Such assets are recognised initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition loans and receivables are measured at amortised cost using the effective interest method, less any impairment losses. Loans and receivables comprise trade and other receivables and cash and cash equivalents.

Cash and cash equivalents comprise cash balances and call deposits. Bank overdrafts that are repayable on demand and form an integral part of the group's cash management are included as a component of cash and cash equivalents for the purpose of the statement of cash flows.

In the case of the company, the long-term receivable represents the participation in export partnerships and, subsequent to initial recognition, is measured at amortised cost less impairment losses. Amortised

for the year ended 31 December 2010

cost is the company's cost of the original participation plus its share of the gross profit less the share of the subsequent net amounts received as partner in the partnerships.

Non-derivative financial liabilities

The group initially recognises debt securities issued and subordinated liabilities on the date that they are originated. All other financial liabilities (including liabilities designated at fair value through profit or loss) are recognised initially on the trade date at which the group becomes a party to the contractual provisions of the instrument. Debt issuance costs are capitalised and amortised over the term of the debt as required by application of the effective interest method. The group derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

The group classifies non-derivative financial liabilities into the following categories: financial liabilities at fair value through profit or loss and other financial liabilities. Other financial liabilities are recognised initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, these financial liabilities are measured at amortised cost using the effective interest rate method. Other financial liabilities comprise borrowings and trade and other payables.

The amounts attributable to third parties in respect of long-term receivables are designated at fair value through profit or loss. To determine fair value, the amounts are discounted to their net present value at a rate considered appropriate, having regard to their term and their denominated currency. The deferred portion of expenditure is allocated over the period of the agreements on a basis which produces a constant periodic rate of return.

Financial liabilities are derecognised if the group's obligations specified in the contract expire or are discharged or cancelled.

3.3.2 Derivative financial instruments

The group holds derivative financial instruments to hedge its foreign exchange and interest rate risk exposures arising from operational, financing and investment activities. Embedded derivatives are separated from the host contract and accounted for separately if the economic

characteristics and risks of the host contract and the embedded derivative are not closely related, a separate instrument with the same terms as the embedded derivative, would meet the definition of a derivative, and the combined instrument is not measured at fair value through profit or loss. In accordance with its treasury policy, the group does not hold or issue derivative financial instruments for trading purposes.

Derivative financial instruments are recognised initially at fair value; attributable transaction costs are recognised in profit or loss when incurred. Subsequent to initial recognition, derivatives are measured at fair value. The gain or loss on remeasurement to fair value is recognised immediately in profit or loss in all instances as the group does not apply hedge accounting.

The fair value of interest rate swaps is the estimated amount that the group would receive or pay to terminate the swap at the reporting date, taking into account current interest rates and the current creditworthiness of the swap counterparties.

Hedge accounting is not applied to derivative instruments that economically hedge monetary assets and liabilities denominated in foreign currencies. Changes in the fair value of such derivatives are recognised in profit or loss as part of foreign currency gains and losses. Changes in the fair value of separable embedded derivatives are recognised immediately in profit or loss.

3.3.3 Share capital

Ordinary shares

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares and share options are recognised as a deduction from equity, net of any tax effects.

Dividends

Dividends (treated as distributions within equity) are recognised as a liability in the period in which they are declared.

3.3.4 Offsetting

Financial assets and liabilities are offset and the net amount presented in the statement of financial position when the group has a legally enforceable right to set off the amounts and intends either to settle on a net basis or to realise the asset and settle the liability simultaneously. Income and expenses are presented on a net basis only when permitted by the accounting standards, or for gains and losses arising from a group of similar transactions.

3.4 Property, plant and equipment

3.4.1 Recognition and measurement

Owned assets

Items of property, plant and equipment are measured at cost less accumulated depreciation (refer to note 3.4.3) and accumulated impairment losses (refer note 3.9).

Cost includes expenditures that are directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labour and any other costs directly attributable to bringing the asset to a working condition for its intended use. Purchased software that is integral to the functionality of the related equipment is capitalised as part of that equipment.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Gains and losses on disposal of an item of property, plant and equipment (other than containers in the leasing fleet) are determined by comparing the proceeds from disposal with the carrying amount of property, plant and equipment, and are recognised on a net basis within other income in profit or loss. When containers in the leasing fleet cease to be rented or become held for sale they are transferred to inventory at their carrying amounts. On disposal the proceeds on the sale of these assets are recognised in revenue in accordance with IAS 18 Revenue and the carrying value is included in changes in inventories.

Leased assets

Leases in terms of which the group assumes substantially all the risks and rewards of ownership are classified as finance leases. Upon initial recognition the leased asset is measured at an amount equal to the lower of its fair value and the present value of the minimum lease payments. Lease payments are accounted for as described in note 3.13.1.

3.4.2 Subsequent costs

The cost of replacing part of an item of property, plant and equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits

embodied within the part will flow to the group and its cost can be measured reliably. The carrying amount of the replaced part is derecognised. The costs of the day-to-day servicing of property, plant and equipment are recognised in profit or loss as incurred.

3.4.3 Depreciation

Depreciation is calculated over the depreciable amount, which is the cost of an asset, less its residual value.

Depreciation is recognised in profit or loss on a straight-line basis over the estimated useful lives of each part of an item of property, plant and equipment since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. Leased assets are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the group will obtain ownership by the end of the lease term. Land is not depreciated.

The estimated useful lives for the current and comparative periods are as follows:

	Years
Owner occupied buildings	50
Container leasing equipment	12
Plant and machinery	9
Motor vehicles	4 – 5
Other equipment	3 – 10

Depreciation methods, useful lives and residual values are reassessed at each reporting date and adjusted if appropriate.

3.5 Goodwill

Goodwill/Negative goodwill arises on the acquisition of subsidiaries and associates.

In respect of acquisitions prior to 1 January 2004, goodwill is included at its carrying amount, which represents the amount recorded under the group's previous accounting framework (South African Statements of Generally Accepted Accounting Practice), at the date of transition to IFRS.

For acquisitions on or after 1 January 2004, goodwill represents the excess of the cost of the acquisition over the group's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities of the acquiree. When negative goodwill arises, it is recognised immediately in profit or loss.

For acquisitions on or after 1 January 2010, the group measures goodwill at the acquisition date as:

• the fair value of the consideration transferred; plus

for the year ended 31 December 2010

- the recognised amount of any non-controlling interests in the acquiree; plus if the business combination is achieved in stages, the fair value of the existing equity interest in the acquiree; less
- the net recognised amount (generally fair value) of the identifiable assets acquired and liabilities

When the excess is negative, a bargain purchased gain is recognised immediately in profit or loss.

The consideration transferred does not include amounts related to the settlement of pre-existing relationships. Such amounts are generally recognised in profit or loss. Costs related to the acquisition, other than those associated with the issue of debt or equity securities, that the group incurs in connection with a business combination are expensed as incurred. Any contingent consideration payable is recognised at fair value at the acquisition date. If the contingent consideration is classified as equity, it is not remeasured and settlement is accounted for within equity. Otherwise, subsequent changes to the fair value of the contingent consideration are recognised in profit or loss.

3.5.1 Acquisitions of non-controlling interests

Acquisitions of non-controlling interests are accounted for as transactions with equity holders in their capacity as owners and therefore no goodwill is recognised as a result of such transactions.

3.5.2 Subsequent measurement

Goodwill is measured at cost less accumulated impairment losses. In respect of equity accounted investees, the carrying amount of goodwill is included in the carrying amount of the investment, and an impairment loss on such an investment is not allocated to any asset, including goodwill, that forms part of the carrying amount of the equity accounted investee.

3.6 Intangible assets

Intangible assets consist of exclusive rights to manage various fleets of containers and are measured at cost less accumulated amortisation (refer to note 3.6.2) and accumulated impairment losses (refer to note 3.9). Expenditure on internally generated goodwill and brands is recognised in profit or loss as an expense as incurred.

3.6.1 Subsequent expenditure

Subsequent expenditure on capitalised intangible assets is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other subsequent expenditure is expensed as incurred.

3.6.2 Amortisation

Intangible assets with finite useful lives are amortised over their useful lives. Container management contracts are amortised based on the fees generated from the underlying container management agreements (which reflects the pattern in which the asset's future economic benefits are expected to be consumed by the group). The estimated useful lives are reassessed annually and are as follows for the current and comparative periods:

Years

Container management contracts 11 – 13

3.7 Net investment in finance leases

Amounts due from lessees under finance leases are recorded as receivables at the amount of the group's net investment in the leases.

3.8 Inventories

Inventories are measured at the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated selling expenses.

The cost of inventories is based on the first-in firstout principle and includes expenditure incurred in acquiring the inventories, and other costs incurred in bringing them to their existing location and condition.

3.9 Impairment

3.9.1 Financial assets

At each reporting date the group assesses whether there is objective evidence that financial assets not carried at fair value through profit or loss are impaired. A financial asset is considered to be impaired if objective evidence indicates that a loss event has occurred after the initial recognition of the asset, and that the loss event had a negative effect on the estimated future cash flows of that asset that can be estimated reliably.

Objective evidence that financial assets (including equity securities) are impaired can include default or delinquency by a debtor, restructuring of an amount due to the group on terms that the group would not consider otherwise, indications that a debtor or issuer will enter bankruptcy, and the disappearance of an active market for a security. In addition, for an investment in an equity security, a significant or prolonged decline in its fair value below its cost is objective evidence of impairment.

The group considers evidence of impairment for receivables at both a specific asset and collective level. All individually significant receivables are assessed for specific impairment. All individually significant receivables found not to be specifically impaired are then collectively assessed for any impairment that has been incurred but not yet identified. Receivables that are not individually significant are collectively assessed for impairment by grouping together receivables with similar risk characteristics. In assessing collective impairment the group uses historical trends of the probability of default, timing of recoveries and the amount of loss incurred, adjusted for management's judgement as to whether current economic and credit conditions are such that the actual losses are likely to be greater or less than suggested by historical trends.

An impairment loss in respect of a financial asset measured at amortised cost is calculated as the difference between its carrying amount and the present value of the estimated future cash flows discounted at the original effective interest rate. Losses are recognised in profit or loss and reflected in an allowance account against receivables. When a subsequent event causes the amount of impairment loss to decrease, the decrease in impairment loss is reversed through profit or loss.

An impairment loss in respect of an availablefor-sale financial asset is calculated with reference to its current fair value. Impairment losses on available-for-sale investment securities are recognised by transferring the cumulative loss that has been recognised in other comprehensive income, and presented in the fair value reserve in equity, to profit or loss. The cumulative loss that is removed from other comprehensive income and recognised in profit or loss is the difference between the acquisition cost and the current fair value, less any impairment loss previously recognised in profit or loss. If, in a subsequent period, the fair value of an impaired available-for-sale debt security increases and the increase can be related objectively to an event occurring after the impairment loss was recognised in profit or loss, then the impairment loss is reversed, with the amount of the reversal recognised in profit or loss. However, any subsequent recovery in the fair value of an impaired available-for-sale equity security is recognised in other comprehensive income.

3.9.2 Non-financial assets

The carrying amount of the group's non-financial assets, other than inventories and deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists then the asset's recoverable amount is estimated. For goodwill and intangible assets that have indefinite lives or that are not yet available for use, the recoverable amount is estimated at each reporting date.

An impairment loss is recognised if the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. A cash-generating unit is the smallest identifiable asset group that generates cash flows that largely are independent from other assets and groups. Impairment losses are recognised in profit or loss. Impairment losses in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to the units and then to reduce the carrying amount of the other assets in the unit on a pro-rata basis.

The recoverable amount of an asset or cashgenerating unit is the greater of its value in use and its fair value less cost to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

An impairment loss in respect of goodwill is not reversed. In respect of other assets, impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

3.10 Provisions

A provision is recognised in the statement of financial position when the group has a present legal or constructive obligation that can be

for the year ended 31 December 2010

estimated reliably and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pretax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognised as a finance expense.

3.11 Revenue

3.11.1 Goods sold

Revenue from the sale of goods is measured at the fair value of the consideration received or receivable, net of returns and allowances, trade discounts and volume rebates. Revenue is recognised in profit or loss when persuasive evidence exists, usually in the form of an executed sales agreement, that the significant risks and rewards of ownership have been transferred to the customer, recovery of the consideration is probable, the associated costs and possible return of goods can be estimated reliably, there is no continuing managerial involvement with the goods, and the amount of revenue can be measured reliably. Revenue includes realised and unrealised exchange differences arising from the translation of long-term receivables.

3.11.2 Leasing income

Marine cargo containers

Leasing income arises principally from operating and finance leases.

Under operating leases, container equipment owned by group companies is rented to various shipping lines and revenue is earned and recognised evenly over the period that the equipment is on lease, according to the terms of the contracts. These contracts are typically for terms of five years or less. Considerations received in advance for future operating lease payments are discounted to their present values and deferred over the lease term.

Under finance leases, containers are leased for the remainder of the container's useful life with a purchase option at the end of the lease term. Revenue is earned and recognised over the lease term so as to produce a constant periodic rate of return on the net investment in the lease.

The group's leases generally require the lessee to pay for any damage to the container beyond normal wear and tear at the end of the lease term. The group offers a damage protection plan (DPP) to certain of its lessees. In terms of the DPP, the group

charges an amount, in addition to lease rentals, primarily on a daily basis and the lessees are no longer obligated for certain future repair costs for containers subject to the DPP. It is the group's policy to recognise these revenues as earned on a daily basis over the related term of the lease.

The group has not recognised revenue and related expense under the DPP for customers who are charged at the end of the lease term or for other lessees who do not participate in the DPP. Based on past history, there is uncertainty as to the collectibility of these amounts from lessees who are billed at the end of the lease term because the amounts due under the DPP are typically renegotiated at the end of the lease term or the lease term is extended.

3.11.3 Management fees

Management fees consist of fees earned by group companies for services related to the management of container equipment, reimbursements of administrative services necessary for the operation and management of equipment and net acquisition fees and sales commissions earned on the acquisition and sale of equipment. Management fees are earned under management agreements on an as earned basis. Fees are typically calculated as a percentage of net operating income due to the owners of the fleets managed (which is revenue from the containers under management minus direct operating expense related to those containers).

3.11.4 Dividend income

In the case of the company, revenue comprises dividend income and is recognised when the right to receive payment is established.

3.12 Expenses

3.12.1 Operating lease payments

Payments made under operating leases are recognised in profit or loss on a straight-line basis over the term of the lease.

3.12.2 Net finance expenses

Interest expense comprises the effective interest expense on financial liabilities measured at amortised cost. Capitalised debt issuance costs which are amortised over the term of the debt are included in interest expense as required by application of the effective interest method.

Interest income is recognised in profit or loss as it accrues, using the effective interest method.

Fair value gains or losses on interest rate swaps are included in finance expenses.

3.13 Employee benefits

3.13.1 Short-term employee benefits

The cost of all short-term employee benefits is recognised during the year in which the employee renders the related service. The accruals for employee entitlements to remuneration and annual leave represent the amount which the group has a present obligation to pay as a result of employees' services provided to the reporting date. The accruals have been calculated at undiscounted amounts based on current remuneration rates.

3.13.2 Retirement benefits

Certain of the company's subsidiaries contribute to defined contribution retirement funds. A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. Obligations for contributions to these funds are recognised in profit or loss in the period during which services are rendered by employees.

3.13.3 Share-based payments

The company and certain of its subsidiaries grant share options to certain employees under share option plans which are all classified as equity settled.

The grant date fair value of options granted is recognised as an employee expense with a corresponding increase in equity. The fair value is measured at grant date and spread over the period during which the employees become unconditionally entitled to the options. The fair value of the options is measured using the Actuarial Binomial Model or Black-Scholes option pricing model, taking into account the terms and conditions upon which the options were granted. The amount recognised as an expense is adjusted for service and non-market performance conditions, so as to reflect the actual number of share options that vest.

3.14 Income tax

Income tax on the profit or loss for the year comprises current and deferred tax. Income tax is recognised in profit or loss except to the extent that it relates to items recognised directly in equity or in other comprehensive income.

Current tax is the expected tax payable on the estimated taxable income for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years. Current tax payable also includes any tax liability arising from the declaration of dividends.

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The following temporary differences are not provided for: the initial recognition of goodwill, the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit, and differences relating to investments in subsidiaries and associates to the extent that they will probably not reverse in the foreseeable future.

The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, based on the tax rates that have been enacted or substantively enacted at the reporting date. Deferred tax assets and liabilities are off-set if there is a legally enforceable right to off-set current tax assets and liabilities, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax assets and liabilities on a net basis or their tax assets and liabilities will be realised simultaneously.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Additional income taxes that arise from the distribution of dividends are recognised at the same time as the liability to pay the related dividend. Secondary tax on companies ('STC') is recognised as part of the current tax charge in profit or loss when the net dividend is declared, except where the group exemption has been elected, resulting in no STC consequences for the company. When dividends received in the current year can be offset against future dividend payments to reduce the STC liability, a deferred tax asset is recognised to the extent of probable future reductions in STC.

3.15 Discontinued operations

A discontinued operation is a component of the group's business that represents a separate major line of business or geographical area of operations that has been disposed of or is held for sale, or is a subsidiary acquired exclusively with a view to resale.

910

Notes to the Financial Statements

for the year ended 31 December 2010

Classification as a discontinued operation occurs upon disposal or when the operation meets the criteria to be classified as held for sale, if earlier. A disposal group that is to be abandoned may also qualify as a discontinued operation. Where an operation is classified as a discontinued operation, the comparative income statement is restated as if the operation had been discontinued from the start of the comparative period.

3.16 Earnings per share

The group presents basic and diluted earnings per share data for its shares. Basic earnings per share is calculated by dividing the profit or loss attributable to shareholders of the company by the weighted average number of shares outstanding during the period. Diluted earnings per share is determined by adjusting the profit or loss attributable to shareholders and the weighted average number of shares outstanding for the effects of all potential dilutive instruments, which comprise share options granted to employees.

3.17 Segment reporting

An operating segment is a component of the group that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the group's other components. All operating segments' operating results are reviewed regularly by the board to make decisions about resources to be allocated to the segment and assess its performance, and for which discrete financial information is available. Segment results that are reported to the board include items that are directly attributable to the segment. Unallocated items comprise mainly corporate assets, head office expenses and income tax assets and liabilities. Segment capital expenditure is the total cost incurred during the year to acquire property, plant and equipment and intangible assets.

Based on the nature of the group's operations, geographical segment information is not distinguishable or relevant.

3.18 Financial guarantee contracts

Financial guarantee contracts are contracts that require the group or the company to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the terms of a debt instrument.

Financial guarantee liabilities are initially recognised at their fair value, and the initial fair value is amortised over the life of the financial guarantee. The guarantee liability is subsequently carried at the higher of this amortised amount and the present value of any expected payment (when a payment under the guarantee has become probable) determined in accordance with IAS 37 *Provisions*.

	607	634	1	2	

- 8.1 Total receivables in base currency amounted to US\$209 million (2009: US\$231 million).
- 8.2 Long-term receivables are valued by discounting future cash flows. The discount rate applied to the receivables (denominated in US\$) is 8,5% p.a. (2009: 8,5% p.a.). An appropriate fair value adjustment is made to the net investment for the estimated timing of receipt and the possible non-collectibility of these receivables, and the related effect on the payment to third parties. The net present value of the long-term receivables and the related fair value adjustment were translated into SA rand at US\$1 = R6,61 (2009: US\$1 = R7,35). Approximately 98% (2009: 85%) of the net adjustment relates to the estimated timing of receipt and is in the nature of deferred income and approximately 2% (2009: 15%) relates to the possible non-collectibility of receivables. There has been a base currency decrease equal to R189 million in the fair value adjustment (2009: R14 million increase).
- 8.3 The amounts attributable to third parties in respect of the long-term receivables are denominated in SA rand and are valued by discounting future cash flows at 10% p.a. (2009: 10% p.a.). These are payable as and when the proceeds from the related long-term receivables are received.
- 8.4 The amounts attributable to third parties in respect of the long-term receivables are made up as follows:

	Group	
	2010 Rm	2009 Rm
Total amounts attributable to third parties	359	392
Less deferred expenditure	27	38
Net present value of amounts attributable to third parties	332	354

Non-current finance lease receivables	8				325	447
Current finance lease receivables incl	uded in curren	t assets			112	125
					437	572

- 9.1 Net investment in finance leases represents amounts receivable in respect of containers leased to shipping lines. The containers are usually leased for their useful lives with a purchase option at the end of the lease term. There are no contingent rentals.
- 9.2 The interest rate inherent in the leases is fixed at the contract date for the full term of the lease. The average effective interest rate contracted approximates 9,68% p.a. (2009: 11,37% p.a.).
- 9.3 Unguaranteed residual values of assets leased under finance leases at the reporting date are estimated at R0,3 million (2009: R0,4 million).
- 9.4 The net investment in finance leases has been pledged as security for a loan (refer to note 18).
- 9.5 The fair value of the net investment in finance leases is R426 million (2009: R549 million) (refer to note 30). No impairment loss has been recognised as the difference between carrying value and fair value resulted from changes in current market interest rates without any changes to future contractual cash flows.

10. Derivative financial instruments

The group's various derivative instruments at 31 December comprise:

			Notional amount of contracts	Fair v	alue
			outstanding	Assets	Liabilities
Type of contract	Final maturity	Underlying	Rm	Rm	Rm
2010					
Interest rate cap contracts	November 2015	Interest rates	893	-	-

129

25

(7)

148

- 11.2 In certain of the countries in which group companies operate, local tax laws provide that earnings only be taxed in those jurisdictions when the earnings are transferred out of such jurisdictions. It is intended that these earnings be permanently reinvested in those countries. At 31 December 2010, cumulative earnings of approximately R240 million (2009: R250 million) would be subject to income taxes of approximately R71 million (2009: R71 million) if such earnings of foreign companies were transferred out of such jurisdictions in the form of dividends.
- 11.3 In the case of the company, the deferred tax liability of R1 million (2009: R1 million) arises as a result of its participation in export partnerships.
- 11.4 In the case of the company, there were no temporary differences associated with investments in subsidiaries and associate companies for which deferred tax liabilities have not been recognised (2009: nil).

	234	206	234	206

A final dividend of 100 cents per share in respect of financial year 2010 (2009: 85 cents per share) was declared by the board on 28 February 2011. This dividend will be subject to STC of R19 million (2009: R16 million).

17.4 The company has no distributable reserves which could be distributed by way of dividends and subject to STC (2009: nil).

17.5 Reserves

Fair value reserve

The fair value reserve includes the cumulative net change in the fair value, other than impairments, of available-for-sale investments until the investment is derecognised.

Foreign currency translation reserve

The translation reserve comprises all foreign exchange differences arising from the translation of the financial statements of foreign operations.

Equity compensation reserve

The equity compensation reserve comprises the cumulative value of equity-settled share-based payments.

Gain on dilution of investment in subsidiaries

This reserve represents the cumulative net gain on the dilution of the group's investment in subsidiaries.

Preference share amortisation adjustment

This reserve in the company comprises the difference between the present value of the subscription price of the preference shares paid at acquisition and the amount written up to the subscription price through profit or loss using the amortised cost method (refer to note 7).

									5 475	4 538

- 18.1 The secured loans are secured by way of a pledge against certain of the group's property, plant and equipment and investments in finance leases as well as requirements by lenders that a group company hold restricted cash as additional collateral for borrowings (refer to notes 4, 9 and 12 respectively).
- 18.2 Debt issuance costs of R85 million (2009: R1 million) were capitalised during the year.
- 18.3 In terms of the articles of association, the company's borrowing powers are unlimited. The company's borrowings are disclosed in note 7.
- 18.4 Details of the group's borrowing facilities are as follows:

	Group	
	2010 Rm	2009 Rm
Total borrowing facilities	7 816	7 048
Actual borrowings at the end of the year	5 882	5 057
Unutilised facilities	1 934	1 991

18.5 Certain loans have restrictive covenants including minimum net worth requirements, minimum working capital requirements and maintenance of minimum levels of profitability. The borrowing companies were in compliance with the covenants throughout the year.

for the year ended 31 December 2010

19. Deferred revenue

During the previous financial year, Textainer simultaneously entered into purchase and operating lease transactions in respect of specific containers, with a shipping line. The reduced rental rates agreed as part of these transactions effectively resulted in the shipping line prepaying lease rentals by accepting a lower purchase price for the containers. As a result, Textainer recognised deferred revenue (to be recognised in profit or loss over the lease term). This deferred revenue equals to the present value of rental revenue that would have been recognised under operating leases if Textainer received marketrelated rental rates. The containers purchased were recorded at the sum of the amount paid in cash and the present value of the lease rentals as calculated above (which approximated or were less than their fair values).

- 23.1 Certain group companies are not subject to tax in their country of incorporation. However, these companies are subject to tax in certain other jurisdictions due to the nature of their operations. The group estimates the tax liability based upon its interpretation of the tax laws of the various countries in which it operates. Deferred income taxes reflect temporary differences attributable to various jurisdictions at the appropriate statutory tax rates.
- 23.2 Certain group companies participate in export partnerships. As these companies were liable to the partnerships for the tax effect in the first year of their participation, the amount thereof was disclosed as an associated tax charge. In subsequent years the partnerships become liable to the companies for the tax arising as the underlying receivables are collected. The amount thereof is disclosed as an associated tax credit.

Summary of activity in share option plans:

Trencor

Options granted to employees effective 30 June 2001 who were in employment for less than five years at grant date, vested over a total period of six years from the option grant date. Those issued to employees in employment for more than five years at grant date vested over a total period of three years. In terms of the transitional provisions of IFRS 2 *Share-based Payments* the company elected not to apply this standard to these share-based payments, since they were granted before 7 November 2002.

Outstanding at 31 December 2010	200 000	200 000	400 000	12,10	2012

No options were exercised during the year. The weighted average share price at date of exercise in 2009 was R20,81 per share.

Majahtad

28. Employee benefits (continued)

28.1 Share-based payments (continued)

The fair value of the share options at grant date is determined based on the Actuarial Binomial Model. The model inputs were as follows:

	Grant date
	11 June
	2004
Number of options granted	400 000
Fair value at measurement date (R)	7,67
Share price at grant date (R)	12,10
Expected option lifetime (years)	5 – 7
Volatility %	50,5 – 52,8
Dividend yield %	0,0
Risk free % rate (based on national government bonds)	10,0 – 10,1

In determining share price volatility, consideration has been given to historic volatility as well as the expected option lifetime.

Textainer

Textainer granted share options through five share option plans, the 1994 Plan, the 1996 Plan, the 1997 Plan, the 1998 Plan and the 2001 Plan to certain employees to purchase shares of its common stock. The options under these plans have all vested and have been exercised in prior periods.

Textainer has one active share option and restricted share unit plan, the 2007 Plan. The 2007 Plan provides for the grant of share options, restricted share units, restricted shares, share appreciation rights and dividend equivalent rights. The 2007 Plan provides for grants of incentive share options only to its employees or employees of any parent or subsidiary of Textainer. Awards other than incentive share options may be granted to its employees, directors and consultants or the employees, directors and consultants of any parent or subsidiary of Textainer. There are no performance criteria attached to the option plan. The options vest over a total period of four years in increments of 25% per annum beginning approximately one year from grant date. All options lapse after a period of ten years from date of grant. Beginning approximately one year after a restricted share unit's grant date for each restricted share unit granted in 2007, 2008 and 2009, each employee's restricted share units vest in increments of 15% per year for the first two years, 20% for the third year and 25% for the fourth and fifth years. Beginning approximately one year after a restricted share unit's grant date for each restricted share unit granted in 2010, each employee's restricted share units vest in increments of 25% per year.

The following is a summary of activity in the 2007 Plan:

Share options

Trencor Limited Annual Report 2010

Notes to the Financial Statements

for the year ended 31 December 2010

28. Employee benefits (continued)

28.1 Share-based payments (continued)

The fair value of the share options at grant date is determined based on the Black-Scholes option pricing model with the following assumptions:

	Options granted			
	18 November 2010	18 November 2009	19 November 2008	9 October 2007
Number of options granted under the 2007 Plan	151 687	218 904	251 418	1 052 618
Fair value at measurement date (US\$)	9,82	4,69	0,60	3,62
Share price at grant date (US\$)	28,26	16,97	7,19	16,50
Expected life option time (years)	6,3	6,3	6,3	6,4
Volatility %	50,1	46,0	35,3	31,3
Dividend yield %	3,8	5,4	13,0	4,9
Risk free % rate (based on US Treasury bonds)	2,0	2,6	2,5	4,5

In determining share price volatility, consideration has been given to the historic volatility of publicly traded companies within Textainer's industry.

28.2 The amounts included in staff costs in respect of share-based payments are:

	Gı	roup
	2010 Rm	2009 Rm
Equity-settled	34	38

28.3 Retirement benefit funds

Membership of the Trencor Pension Fund, a defined contribution fund governed by the Pension Funds Act, is compulsory for all permanent employees in South Africa.

At 31 December 2010 the fund had 17 members (2009: 17 members) whose aggregate share of the fund amounted to R50 million (2009: R48 million). The fund has no liability in respect of pensions as all pensioners were transferred to an insurer and all new retirees purchase annuities from insurers.

Certain non-South African group companies offer defined contribution plans for their employees in the various jurisdictions in which they are employed. None of these plans have any defined liability in respect of pensioners.

29. Segment reporting **Business segments**

- 29.1 The group has two operating segments as described below, which are the group's strategic business units. The strategic business units are managed separately as they offer entirely different services. For each of the strategic business units, the board reviews internal management reports on at least a quarterly basis. The following summary describes the operations in each of the group's reportable segments: container finance, and container owning, leasing, management and reselling.
- 29.2 Information regarding the results of each reportable segment is included below. Performance is measured based on segment profit before interest and income tax, as included in the internal management reports. Segment profit before net finance income/expenses and income tax is used to measure performance as management believes that such information is the most relevant in evaluating the results of certain segments relative to other entities that operate within these industries. There is no inter-segment activity.

30. Financial instruments and risk management (continued)

30.2 Overview

The group's activities expose it to the following risks from its use of financial instruments:

- · liquidity risk; and
- market risk (including currency risk, interest rate risk and price risk).

This note presents information about the group's exposure to each of the above risks, the group's objectives, policies and processes for measuring and managing risk, and the group's management of capital.

The group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the group.

The directors have overall responsibility for the establishment and oversight of the group's risk management framework. Risk management is carried out by the executive committee and management at operating levels under policies approved by the directors. The board provides written principles for the overall risk management, as well as written policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and investing excess liquidity.

The risk management policies are established to identify and analyse the risks faced by the group to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk policies and systems are reviewed regularly to reflect changes in market conditions and the group's activities.

The group audit committees oversee how management monitors compliance with the group's risk management policies and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the group. The group regularly undertakes ad-hoc reviews of risk management controls and procedures, the results of which are reported to the audit committee.

Credit risk is the risk of financial loss to the group if a customer or counterparty to a financial instrument fails to meet its contractual obligations.

30.3.1 Credit risk exposure

The carrying amount of financial assets and the total amounts guaranteed (refer to note 32) represent the maximum credit exposure. The maximum exposure to credit risk from financial assets at 31 December was:

	Gro	oup	Company		
	2010	2009	2010	2009	
	Rm	Rm	Rm	Rm	
Available-for-sale financial assets					
Investments	14	14	_	_	
Financial assets designated at fair value through					
profit or loss					
Long-term receivables	977	956	_	_	
Investments	235	258	_	-	
Net investment in finance leases	437	572	_	-	
Financial assets held for trading					
Derivative financial instruments	9	5	_	-	
Loans and receivables excluding cash and cash					
equivalents					
Trade receivables	420	508	_	_	
Restricted cash	99	48	_	_	
Other	21	11	1	2	
Amount due by subsidiary – short-term	_	_	65	82	
Cash and cash equivalents	1 029	1 104	_		
	3 241	3 476	66	84	

The group's credit risk arises principally from the group's long-term receivables, derivative financial instruments (interest rate swap and cap contracts), trade receivables, investment securities and cash and cash equivalents.

Available-for-sale financial assets

Due to the amount of the group's available-for-sale financial assets, credit risk is not considered to be significant.

Financial assets designated at fair value through profit or loss

Credit risk with respect to long-term receivables is determined by the creditworthiness of the international customers to whom containers are supplied. Management closely monitors the activities and performance of these customers. Long-term receivables are valued by discounting future cash flows and an appropriate adjustment is made to the net investment for the estimated timing of receipt and possible non-collectibility of these receivables and the related effect on the payment to third parties.

The most significant long-term receivable at 31 December 2010 related to TAC Limited totalling R608 million (2009: R780 million). Approximately 82% (2009: 80%) of the TAC containers measured on a twenty-foot equivalent unit basis are managed by Textainer.

59

Trencor Limited Annual Report 2010

30. Financial instruments and risk management (continued)

30.3 Credit risk (continued)

30.3.1 Credit risk exposure (continued)

Financial assets designated at fair value through profit or loss (continued)

Credit risk with respect to the investment in the protected currency basket note is not considered significant as the investment is guaranteed by the issuing bank which has an acceptable credit rating.

Net investment in finance receivables

There is no significant concentration of credit risk relating to the net investment in finance leases.

Financial assets held for trading

With respect to the interest rate swap and cap contracts, the group's exposure to credit risk is determined with reference to the counterparties with which they contract and the markets and countries in which those counterparties conduct their business. Limits are established in advance for all credit exposures within strict company guidelines. Individual limits and the utilisation of those limits are continually reassessed. The group minimises such credit risk by limiting the counterparties to a group of major financial institutions, regulated by the relevant regulatory bodies, and does not anticipate incurring any losses as a result of non-performance by these counterparties.

Loans and receivables

Credit risk with respect to trade and other receivables is mitigated by the diverse customer base. The risk arising on short-term trade and other receivables is also managed through a group policy on the granting of credit limits and continual review and monitoring of these limits. At 31 December 2010 one customer accounted for 14% of the group's trade receivables (2009: two customers – 35%).

The maximum exposure to credit risk for trade receivables at the reporting date by type of customer was:

	Gro	oup
	2010 Rm	2009 Rm
Container leasing customers	420	507
Other	-	1
	420	508

Cash and cash equivalents

The group's cash and cash equivalents are placed with financial institutions having acceptable credit ratings.

30.3.2 Impairment losses

The group establishes an allowance for impairment that represents its estimate of incurred losses in respect of trade and other receivables. The main components of this allowance are a specific loss component that relates to individually significant exposures, and a collective loss component established for groups of similar assets in respect of losses that have been incurred but not yet identified. The collective loss allowance is determined based on historical data of payment statistics for similar financial assets.

		Group							
•			Total impair-	Net trade receiv-			Total impair-	Net trade receiv-	
	Gross ¹	Gross ²	ment	ables	Gross ¹	Gross ²	ment	ables	
		20 ⁻	10			20	09		
	Rm	Rm	Rm	Rm	Rm	Rm	Rm	Rm	
The ageing of trade receivables at the reporting date was:

	428	49	(57)	420	519	50	(61)	508	

¹ Gross receivables not subject to specific impairment.

² Gross receivables subject to specific impairment.

for the year ended 31 December 2010

30. Financial instruments and risk management (continued)

30.3 Credit risk (continued)

30.3.2 Impairment losses (continued)

The movement in the allowance for impairment in respect of trade receivables during the year was as follows:

	Gre	oup
	2010	2009
	Rm	Rm
Balance at the beginning of the year	61	54
Impairment loss recognised	2	28
Impairment loss reversed	_	(7)
Effect of movements in exchange rates	(6)	(14)
Balance at the end of the year	57	61

The allowance accounts in respect of trade receivables are used to record impairment losses unless the group is satisfied that no recovery of the amount owing is possible; at that point the amounts considered irrecoverable are written off against the financial asset.

30.4 Liquidity risk

Liquidity risk is the risk that the group will not be able to meet its financial obligations as they fall due. The group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the group's reputation.

The risk is managed through cash flow forecasts and ensuring that adequate borrowing facilities are maintained. In terms of the company's articles of association, its borrowing powers are unlimited.

The following are the contractual maturities of financial liabilities, including estimated interest payments and excluding the impact of netting agreements:

Group

			Gro	oup

30.5 Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

The group buys and sells derivatives, and also incurs financial liabilities, in order to manage market risks. All such transactions are carried out within the guidelines set by the board.

30.5.1 Currency risk

The group is exposed to currency risk on sales and purchases and the group's long-term receivables that are denominated in a currency other than the respective functional currencies of group entities, primarily the US dollar and SA rand. The currency in which these transactions are primarily denominated is the US dollar.

The group enters into forward exchange contracts from time to time and as required to buy and sell specified amounts of various foreign currencies in the future at predetermined exchange rates. The contracts are entered into in order to manage the group's exposure to fluctuations in foreign currency exchange rates. The contracts are generally matched with anticipated future cash flows in foreign currencies primarily from sales and purchases. As at 31 December 2010 the group had no exposure to forward exchange contracts (2009: nil).

Notes to the Financial Statements for the year ended 31 December 2010

30. Financial instruments and risk management (continued)

30.5 Market risk (continued)

30.5.1 Currency risk (continued)

The following is an analysis of the group's financial instruments in terms of the currencies in which they are held, expressed in SA rand at 31 December:

Year-end rate		6.61			7.35			

Year-end rate	6,61	7,35
Average rate	7,33	8,33

30. Financial instruments and risk management (continued)

30.5 Market risk (continued)

30.5.1 Currency risk (continued)

The long-term export receivables are all denominated in US dollars. The board has decided that these receivables should remain in US dollars and should not be hedged into any other currency, save that the executive committee is authorised to sell limited amounts due to be collected forward, into SA rand, if it believes that it would enhance the SA rand receipts to do so.

Sensitivity analysis

The group is exposed to currency risk only on those financial instruments that are denominated in a currency other than the respective functional currencies of group entities, namely the group's long-term receivables. A one per cent weakening of the rand against the US dollar would have increased the group's profit by approximately R7 million for the year ended 31 December 2010 (2009: R7 million). This analysis assumes that all other variables, in particular interest rates, remain constant. A one per cent strengthening of the SA rand against the US dollar would have had the equal and opposite effect to the amounts shown above, on the basis that all other variables remain constant.

30.5.2 Interest rate risk

As part of the process of managing the group's fixed and floating rate borrowings mix, the interest rate borrowings mix, the interest rate characteristics of new borrowings and the refinancing of existing borrowings are structured according to anticipated movements in interest rates. All of the group's borrowings are denominated in US dollars.

Textainer has a firm policy that long-term lease business should be financed with fixed rate debt and master lease (short-term) business should be financed with floating rate debt. Interest on loans raised to purchase containers leased out under long-term leases (usually of five years' duration at fixed rates) is swapped into fixed interest rate contracts of a similar term, while loans raised to purchase containers for master lease are at variable rates. Furthermore, the company enters into interest rate cap contracts to guard against unexpected increases in interest rates on a portion of such variable interest rate loans. Textainer does not apply hedge accounting to the interest rate swaps, notwithstanding that such swaps may be economically effective. It accounts on the basis that the net result of the marked-to-market valuation of these instruments is flowed through profit or loss. This may result in volatility of earnings.

The group is exposed to interest rate risk as it places funds in the money market. This risk is managed by maintaining an appropriate mix of term and daily call placements with registered financial institutions which are subject to compliance with the relevant regulatory bodies.

At 31 December the interest rate profile of the group's interest-bearing financial instruments was:

	Group		Com	Company	
	2010 Rm	2009 Rm	2010 Rm	2009 Rm	
Variable rate instruments					
Financial assets	1 128	1 152	65	82	
Financial liabilities	(5 882)	(5 057)	-	-	
	(4 754)	(3 905)	65	82	

Fair value sensitivity analysis for fixed rate instruments

The group does not account for any fixed rate financial assets and liabilities at fair value through profit or loss. An increase/decrease of 100 basis points in interest rates on interest rate swap contracts would have increased/decreased profit by R29 million (2009: R34 million).

Cash flow sensitivity analysis for variable rate instruments

An increase/decrease of 100 basis points in interest rates at the reporting date would have decreased/increased profit or loss by R38 million (2009: R43 million). This analysis assumes that all other variables, in particular foreign currency rates, remain constant.

for the year ended 31 December 2010

30. Financial instruments and risk management (continued)

30.6 Fair value sensitivity for net investment in long-term receivables

The discount rate that is applied to reduce the future long-term dollar receivable stream to its net present value reflects the applicable risk free rate (being the United States Daily Treasury yield curve rate for the appropriate term) plus an industry specific risk premium (refer to note 33). An increase/decrease in the discount rate of 100 basis points would decrease/increase profit by R3 million (2009: R5 million).

The discount rate that is applied to reduce the future stream of rand amounts attributable to the company's export partners in respect of the long-term receivables to its net present value reflects the applicable risk free rate (being the Bond Exchange of South Africa yield curve rate for the appropriate term) adjusted for an appropriate risk premium (refer to note 33). An increase/decrease in the discount rate of 100 basis points would increase/decrease profit by R1 million (2009: R2 million).

30.7 Capital management

Capital is regarded as total equity. The board's policy is to maintain a strong capital base so as to maintain investor. creditor and market confidence and to sustain future development of the business. The board also determines the level of dividends paid to shareholders.

The group may purchase its own shares on the market, if the resources of the company are in excess of its requirements or there are other good grounds for doing so. In this regard the directors will take account of, inter alia, an appropriate capitalisation structure for the company, the long-term cash needs and the interests of the company.

The group monitors capital on the basis of the ratio of interest-bearing borrowings to total equity. This ratio is calculated as interest-bearing borrowings divided by total equity as follows:

	Gro	oup	Com	Company	
	2010 Rm	2009 Rm	2010 Rm	2009 Rm	
Interest-bearing borrowings	5 882	5 057	-	-	
Total equity	5 951	5 746	753	814	
Ratio of interest-bearing borrowings to total equity	98,8%	88,0%	-	_	

The increase in the ratio during 2010 resulted primarily from Textainer increasing its secured debt facility and the utilisation thereof to finance capital expenditure during the year. The strengthening of the SA rand from US\$1 = R7,35 to US\$1 = R6,61 reduced the full impact of this increased level of borrowing.

There were no changes in the group's approach to capital management during the year.

Neither the company nor any of its subsidiaries are subject to externally imposed capital requirements.

The group has provided guarantees in respect of obligations of certain group entities (refer to note 32). At 31 December 2010 the fair value of these guarantees was nil (2009: nil). These guarantees expose the group to credit and liquidity risk.

The fair values of financial instruments have been arrived at after taking into account current market conditions (refer to note 30.1).

30.9.1 Fair value hierarchy

The group measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

Level 1: Quoted market price (unadjusted in an active market for an identical instrument).

Level 2: Valuation techniques based on observable inputs, either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from

Level 3: Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices that are similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

30. Financial instruments and risk management (continued)

30.9 Fair values (continued)

30.9.1 Fair value hierarchy (continued)

The table below analyses the instruments, measured at fair value at 31 December, by level in the fair value hierarchy into which the value measurement is categorised:

	Group			
	Level 1	Level 2	Level 3	Total
	Rm	Rm	Rm	Rm
2010				
Assets				
Long-term receivables	_	_	977	977
Interest rate swap contracts	_	9	_	9
Investment securities	235	15	-	250
	235	24	977	1 236
Liabilities				
Amounts attributable to third parties in respect of				
long-term receivables	-	-	245	245
Interest rate swap contracts	_	90	_	90
	_	90	245	335
2009				
Assets				
Long-term receivables	_	-	956	956
Interest rate swap contracts	_	5	_	5
Investment securities	258	14	_	272
	258	19	956	1 233
Liabilities				
Amounts attributable to third parties in respect of				
long-term receivables	_	_	225	225
Interest rate swap contracts	_	66	_	66
	_	66	225	291

The following table shows a reconciliation from the opening balances to the closing balances for fair value measurements in level 3 of the fair value hierarhy:

Amounts

			due to third parties in	
		Interest	respect of	
	Long-term	rate swap	long-term	
	receivables Rm	contracts Rm	receivables Rm	Total Rm
2009				
Balance at the beginning of the year	1 536	(180)	(253)	1 103
Total (losses)/gains in profit or loss	(283)	33	10	(240)
Settlements	(297)	-	18	(279)
Transfers out of level 3*	-	129	-	129
Effect of movements in exchange rates in equity	-	18	_	18
Balance at the end of the year	956	-	(225)	731
2010				
Total gains/(losses) in profit or loss	179	-	(49)	130
Settlements	(158)	-	29	(129)
Balance at the end of the year	977	_	(245)	732

^{*} The group changed from measuring the fair value of its interest rate swap contracts under a level 3 input to a level 2 input during the year because it began determining the fair value estimate using observable market inputs.

for the year ended 31 December 2010

30. Financial instruments and risk management (continued)

30.9 Fair values (continued)

30.9.1 Fair value hierarchy (continued)

Total gains or losses included in profit or loss for the year in the previous table are presented in the statement of comprehensive income as follows:

	Group				
			Amounts due to third parties in		
	Long-term receivables	Interest rate swap contracts	respect of long-term receivables	Total	
-	Rm	Rm	Rm	Rm	
2010					
Total gains or losses included in profit or loss for the year					
Operating profit	179	_	(52)	127	
Associated tax charge	_	_	3	3	
Total gains or losses for the year included in profit or loss for assets and liabilities held at the end of the year					
Operating profit	125	-	(46)	79	
2009					
Total gains or losses included in profit or loss for the year					
Operating profit	(283)	_	4	(279)	
Net unrealised gain on financial instruments	-	33	-	33	
Associate tax charge	-	_	6	6	
Total gains or losses for the year included in profit or loss for assets and liabilities held at the end of the year					
Operating profit	(331)	-	8	(323)	

Although the group believes that its estimates of fair value are appropriate, the use of different assumptions could lead to different measurements of fair value. For fair value measurement in level 3 of the fair value hierarchy, changing one or more of the unobservable inputs used, to reasonably possible alternative assumptions, would have the following effects:

nave the following effects.	Effects on profit or loss			cts on other nensive income	
	Favourable	Unfavourable	Favourable	Unfavourable	
	Rm	Rm	Rm	Rm	
2010					
Long-term receivables	10	(10)	_	-	
Amounts due to third parties in respect of long-term					
receivables	1	(1)	_		
	11	(11)	_	-	
2009					
Long-term receivables	12	(12)	_	-	
Amounts due to third parties in respect of long-term					
receivables	2	(2)	_		
	14	(14)	_	_	

Long-term receivables and amounts due to third parties in respect of long-term receivables are valued by discounting future cash flows. These cash flows are determined according to the estimates and judgements discussed in note 33. The discount rate applied to the long-term receivables (denominated in US\$) is 8,5% p.a. (2009: 8,5% p.a.), and amounts attributable to third parties in respect of long-term receivables is 10% p.a. (2009: 10% p.a.). An appropriate fair value adjustment is made to the net investment for the estimated timing of receipt and the possible non-collectibility of these receivables, and the related effect on the payment to third parties. The net present value of the long-term receivables and the related fair value adjustment were translated into SA rand at US\$1 = R6,61 (2009: US\$1 = R7,35). The effects noted in the above table are as a result of a 100 basis point change in discount rates and a one per cent change in exchange rates.

31. Related parties

31.1 Identity of related parties

The group has related party relationships with its subsidiaries (refer directors' report), associates and with key management personnel, including its directors and executive officers.

31.2 Intra-group transactions and balances

Amounts due by and to subsidiaries (refer to note 7).

Interest income from subsidiary (refer to notes 7 and 22).

Dividend income from subsidiaries (refer to notes 7 and 21).

Administration fee paid to subsidiary R3 million (2009: nil).

31.3 Transactions with key management personnel

Messrs D M Nurek and E Oblowitz are non-executive directors of certain South African listed companies, some of whose subsidiaries are partners in export partnerships with the group. No new export partnerships have been concluded with these companies since March 1999.

Prior to the appointment of Mr H R van der Merwe as a director, a company in a family trust structure established by him issued 11% redeemable preference shares to a bank, which shares were subsequently acquired by a subsidiary company at a cost of R2,6 million. R1,3 million has been received by way of a partial redemption. The balance of R1,3 million is included in trade and other receivables. Mr H R van der Merwe has provided a put option in favour of the subsidiary company should the redeemable preference shares not be redeemed. The shares are redeemable on 31 days notice at the instance of the company.

Certain non-executive directors are also directors of other companies which have transactions with the group. The relevant directors do not believe they have the capacity to control or significantly influence the financial or operating policies of those companies. Those companies are therefore not considered to be related parties.

The number of shares held by the directors in the issued share capital of the company, other than indirect interests through Mobile Industries Limited, at 31 December were as follows:

	Direct	Indirect	Total
2010			
C Jowell	41 210	20 904	62 114
N I Jowell	41 808	20 904	62 712
J E McQueen	49 649	102 133	151 782
D M Nurek	-	10 000	10 000
E Oblowitz	10 000	-	10 000
	142 667	153 941	296 608
2009			
C Jowell	41 210	20 904	62 114
N I Jowell	41 808	20 904	62 712
J E McQueen	49 649	102 133	151 782
D M Nurek	-	10 000	10 000
E Oblowitz	10 000	-	10 000
	142 667	153 941	296 608

The key management personnel compensation included in staff costs is as follows:

Group		Com	Company	
2010 Rm	2009 Rm	2010 Rm	2009 Rm	
21	21	1	1	
7	9	_	-	
28	30	1	1	
13	10	1	1	
15	20	_	-	
28	30	1	1	
	2010 Rm 21 7 28 13 15	2010 Rm 2009 Rm 21 21 7 9 28 30 13 10 15 20	2010 Rm 2009 Rm 2010 Rm 21 21 1 7 9 - 28 30 1 13 10 1 15 20 -	

for the year ended 31 December 2010

32. Contingent liabilities, guarantees and other commitments

- 32.1 The company has warranted the performance and obligations of certain subsidiary companies in terms of a number of partnership agreements entered into with third parties. The partnerships were established for the purposes of purchasing and selling marine cargo containers. At 31 December 2010, the aggregate amount attributable to third parties in terms of these arrangements and payable to them over the remaining term of the underlying contracts was R359 million (2009: R392 million) (refer to note 8).
- 32.2 A company in which the group has a 100% beneficial interest has guaranteed a portion of certain loan facilities of an associate company. The amount guaranteed at 31 December 2010 was R149 million (2009: R165 million).
- 32.3 At 31 December 2010 the fair value of the above guarantees was nil (2009: nil).

33. Accounting estimates and judgements

Management determines the development, selection and disclosure of the group's critical accounting policies and estimates and the application of these policies and estimates. Certain critical judgements in applying the group's accounting policies are described below:

33.1 Long-term receivables

33.1.1 Discount rate

US dollar cash streams

The discount rate that is applied to reduce the future long-term dollar receivable stream to its net present value is determined by the board from time to time and reflects the applicable risk free rate (being the United States Daily Treasury yield curve rate for the appropriate term) plus an industry specific risk premium. In determining the amount of the specific risk premium to be applied, the board takes cognisance of the then prevailing market conditions.

Rand cash streams

The discount rate that is applied to reduce the future stream of rand amounts attributable to the company's export partners in respect of the long-term receivables to its net present value is determined by the board from time to time and reflects the applicable risk free rate (being the Bond Exchange of South Africa yield curve for the appropriate term) adjusted for an appropriate risk premium.

33.1.2 Fair value adjustment

In calculating the amount of the fair value adjustment to the value of the net investment in long-term receivables that arose from the sale of marine cargo containers, mainly through export partnerships, management considers both the collectability and the anticipated timing of the receipt of future instalments.

Forecasts of anticipated cash collections assist management in determining the necessity for and the amount of any fair value adjustment that may be required. These forecasts are based on estimates and judgements by management of, inter alia, the following variables for the remaining economic lives of the containers:

- New container prices
- · Estimated economic life of containers
- · Resale prices of used containers
- Container lease rates
- · Container fleet utilisations
- Prevailing interest rates
- Past payment history

Management is able to draw on the considerable industry knowledge and experience of Textainer's management in testing the validity and appropriateness of these assumptions.

33.2 Residual values

33.2.1 Marine cargo containers

Marine cargo containers are depreciated over their estimated useful lives to their estimated residual values. The estimated useful life of new containers that are purchased for the leasing fleet is twelve years, based on historical data gathered over a number of years. The estimated residual values vary according to the type of container and are determined with reference to expected proceeds on disposal.

34. Accounting standards and interpretations in issue but not yet effective

A number of new standards, amendments to standards and interpretations are effective for annual periods beginning after 1 January 2010, and have not been applied in preparing these consolidated financial statements:

- 34.1 IFRS 9 Financial Instruments (effective for years commencing on or after 1 January 2013) this standard addresses the initial measurement and classification of financial assets as either measured at amortised cost or at fair value. Financial assets are measured at amortised cost when the business model is to hold assets in order to collect contractual cash flows. All other financial assets are measured at fair value with changes recognised in profit or loss. For an investment in an equity instrument that is not held for trading, an entity may on initial recognition elect to present all fair value changes from the investment in other comprehensive income. IFRS 9 becomes mandatory for the group's 2013 consolidated financial statements and could change the classification and measurement of financial assets. The group does not plan to adopt this standard early and the extent of the impact has not been determined.
- 34.2 Revised IAS 24 Related Party Disclosures (effective for years commencing on or after 1 January 2011) this standard addresses the disclosure requirements in respect of related parties, with the main changes relating to the definition of a related party where new related party relationships have been identified. This standard becomes mandatory for the group's 2011 consolidated financial statements, and is not expected to have a significant impact on the disclosure in the financial statements.

35. Events subsequent to the reporting date

Subsequent to the year-end and pursuant to the unbundling by Mobile Industries Limited of its shareholding in Trencor, the company entered into an agreement with trusts in respect of which Messrs C Jowell and N I Jowell are amongst the beneficiaries to repurchase from those trusts 10 800 881 of the company's ordinary shares at a price of R38,61 per share.

The share repurchase was implemented on 14 March 2011 and resulted in the cancellation of the repurchased shares and a consequent reduction in the issued ordinary share capital of the company to 176 668 011 ordinary shares with a par value of 0,5 cent each.

The repurchase was settled out of the company's cash resources and resulted in a reduction to equity (share capital and premium) of R417 million.

The cancelled repurchased shares have reverted to authorised but unissued share capital.
